

Generator Safety Checklist Australia

for Homes & Workplaces

Stay Safe & Prepared

Before You Start

- Inspect fuel & oil levels
- Check for damage or leaks
- Place generator outdoors
- Have a torch & first-aid kit ready

Safe Generator Use

- Keep at least 3-4 metres from buildings
- Use heavy-duty extension cords
- Never use **indoors** or in garages
- Turn off & cool before refueling

Fuel & Fire Safety

- Store fuel in approved containers
- Keep fuel away from flames
- Let generator cool before refueling
- Have a fire extinguisher nearby

Emergency Contacts

- In Emergencies Call  **000**
- FIRE / RESCUE
- POLICE
- AMBULANCE

Prevent Carbon Monoxide

- Always use **outdoors**
- Ensure good ventilation

Noise & Load Management

- Position to reduce noise
- Avoid** overloading the generator
